

GENER8 THEATRE ARE CALLING ALL YOUTH ARTISTS!

We are on a changed planet. This is an invitation for youth artists, high school and primary school youth located within the Limestone Coast to submit their art work to be considered for a digital installation called 'unearthED'. 'unearthED' will be an innovative first for the region- that is responding to the changing world around us and climate change- and will feature a series of brilliant, architectural mapped shows that transforms buildings and tree into an extraordinary animated display that will be big, bright and spectacular! 'unearthED' will appear for three nights only, from the 27th and 29th of October at run alongside the 2019 Landcare State Community Conference in the very heart of Bordertown.

We welcome local youth and school students-to draw character designs, worlds or landscapes that are artistic responses to climate change, effects of climate change or climate change activism on paper and have it either photographed or scanned and then sent at the highest picture quality. If you choose you can also create your artwork using computer graphic software and you can also upload project files to cloud storage or also email them directly to us. If you choose to create using Digital Software the best examples include Photoshop, Adobe illustrator, Adobe Animate or Gimp. File formats can include JPG or PNG.

WE ARE NOW ACCEPTING ARTWORKS- AND ANYTHING CREATED CAN BE SENT TO
gener8theatre@gmail.com

AND WE WILL NOTIFY YOU IF YOUR ARTWORK MAKES THE FINAL INSTALLATION PIECE!

**All art work must be submitted to Gener8 Theatre
by the 2nd of September 2019.**

unearthED has been made possible thanks to support from
